STRONG DEMAND FOR SILVER COMMEMS IN ALL GRADES

Consensus Quality Coins Abound in Stack's Auction

The Market in Depth

First impressions can be deceiving. That is definitely the case when one gazes upon the thinness of the latest Stack's Auction Catalogue. For inside may be "the finest quality collection ever sold at auction". The Jimmy Hayes Collection will be auctioned October 22, in New York. The collection contains first year type coins from 3¢ silver to silver dollars and includes the commemorative series. Throughout the pages of the auction catalogue, the words superb, gem, presentation piece, choice, and finest known are used extensively. One might even think these descriptions are overworked until one realizes there are only 128 lots in this session. Moreover, these types of coins, in these grades, are the benchmarks by which collectors compare. A few descriptive examples follow: 1792 Half Disme, Superb Gem; 1794 Half Dime, Presentation Piece; 1796 Dime, Gem Proof; 1916 Mercury Dime, Pattern; and 1796 Quarter, one of the finest known.

Stack's then continues the first session and follows with a second session of the Primary Bartle and Carl Zelson Collections on October 23. This sale begins with a run of U.S. proof sets from 1858 to 1891, a total of 33 sets in all (except 1876). There is a run of 23 proof Morgans, including a choice 1895. This is followed by a near complete set of prooflike dollars, a complete set of Charlotte minted gold, a 1933 $10 Indian in choice BU, and an "Ultra High Relief" $20 gold. This will present an opportunity for the extremely advanced collector to bid on a choice BU 1927-D $20 gold. Stack's has made a strong effort to make this, their 50th Anniversary Sale, one to remember.

Technical Grading vs. Eye Appeal---is there a difference? Technical grading was fine in the "old days". You remember the "old days," when coins were either new or used. Technical grading was still acceptable when the MS system was employed to describe every coin series. It would have remained acceptable to this day if it hadn't been for one major change---values. In the last 20 years the values of the majority of U.S. coins in all grades have increased tremendously. As the dollar value of coins increases (in all grades), an additional ingredient is needed to insure the saleability of a particular coin---eye appeal.

No longer is technical grading sufficient to describe the merits of a particular coin. The investor wants to know what qualities the coin possesses which will guarantee that the dealer will want to buy the coin back. The terms eye appeal and Investment Quality Coins (IQC) were instituted because the hobby grew out of a collector state into what is now a major investment medium. Collectors study and love numismatics; investors just want profits and guarantees. Eye appeal and IQC can insure a two-way market. As for profits, there are no guarantees.

This Week's Market

CENTS: As one can see by the large number of minus signs, BU Lincoln rolls have not yet shown any great demand. Many dealers have been waiting for the active areas of the market to heat up Lincolns, when in fact, Lincolns are beginning to drag down other areas. This is not to say that Lincolns are leading this downward trend, but other areas are beginning to show some of the same characteristics.

NICKELS: Various BU Jefferson rolls have been offered at discounted levels, thus, indicating a weakness for the entire series. Most dates without changes are not receiving any activity at all.

DIMES: Demand for original Mercury dime rolls continues strong as new players get involved. The only roll with an actual higher bid is the 1944-S at $690. Roosevelt dime rolls are apparently stagnant at today's levels. Nobody's willing to step out at higher bids, yet, offers to sell at lower levels are not seen either.

QUARTERS: Talk about quiet. Washington quarters in BU (except 1955-D at a higher $210) are even less noticeable than Roosevelt dimes. Many rolls in the 50's are barely bid 3 times silver content, yet, it seems, many of the usual buyers are looking for a long-term trend in silver before they begin buying again.

HALVES: Many dealers are persistent in their quest for original Walking Liberty half rolls. Offers to buy are usually within the bid/ask range, but several dealers would pay more for the right deal.

BU Franklin rolls are following the same trend as the other late-date silver rolls; there's just not much activity.

DOLLARS: The slide continues. Common MS-60 dollars are now bid $32 with 'S' mints at $53. There are a whole lot of sellers at the ask levels. Original rolls have continued to tumble also. Common rolls have fallen to $730, while 'S' mints are $1225. It wasn't that long ago (just prior to ANA) that common rolls were in strong demand at $900 and 'S' mints at $1500.

PROOF SETS and MINT SETS: Silver proof sets from 1960 thru 1964 are offered on a daily basis at lower levels. The 1961-63 sets are searching for recent lows and there doesn't appear to be much support at this time.

Although more dealers are becoming interested in mint sets, their interest is at prices just a little off of bid. A few dates were sold at discounted prices this week. Please check page five.

COMMEMORATIVES: Olympic $10 gold pieces have reached a resistance level. Previously, they were so hot all we could find were higher and higher buy prices, no sell prices. Now, one needs a magnifying glass to find bids, but sell prices are readily available. As of now, sell prices remain within current bid/ask levels.

TYPE: MS-63 type coins are receiving more interest at higher bids. Those sagacious dealers who feel the spread between MS-63 and MS-65 is too wide are beginning to stock up now.

GOLD: Plus signs cover the U.S. gold section. This is the major selling product of many investment houses at this time. Everyone wants gold in their portfolio. Also, the companies that offer guaranteed grading and two-way markets have seen a sizable increase in business over the last month.

As one can see when comparing MS-65 to MS-63, many dealers feel that MS-63 is too low. Don't mistake this to mean that MS-65 is too high. The only reason MS-65 is not increasing now is that strictly graded coins are not plentiful.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $326.50 per ounce.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary

MS-60 (EXTREMELY FINE) Will have slight overall wear but all design details will be sharp. Some contact marks or slight unevenness of strike should have full lustre. These are well above average coins.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight unevenness of strike, should have full lustre. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

The flaw could be so tiny.
The value could be so great.

You Need NCI.

When you're spending a lot of money on a coin, you want to feel confident that you're making the right decision. You need the expert advice of an independent grading service . . . a third party, whose only interest is to grade your coin accurately, fairly, and quickly.

NCI – the Numismatic Certification Institute – is an independent grading service that puts decades of expertise as close as your mailbox. NCI graders are qualified numismatists, who use real-world grading criteria to analyze your coin at every level. Bagmarks, wear, luster, toning, eye appeal, and other factors are carefully considered. It's a tough process . . . but a fair one. And it takes only ten business days or less.

The worth of an NCI grading and authenticity opinion goes far beyond the certificate you receive.. NCI authenticity opinions are guaranteed and insured. And dealers tell us that coins with NCI certificates sell faster. In fact, many dealers feature NCI certified coins in their advertising.

So start feeling a lot more comfortable about your coin buying – and make your own coins sell faster. Get the third-party opinion with real value: NCI. Call Tim LaPointe or Mike Sherman at 800-527-9250 for more information, today.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same charecteristics as the MS-65 --but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtuelly perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63 -but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

PLUS SIGNS SCATTERED OVER MINT STATE GOLD

Common Silver Proof Sets Soften Considerably

The Market in Depth

During and since the ANA original dollar rolls and bags have dropped considerably. True, the majority of the coins available today are the "remains" after bags have been "cherrypicked", but the fact remains that bags and original rolls are available at much lower levels than their recent highs. We are in a transitional period,whereby,the available supply contains no "cream", that is, coins that will bring higher prices as singles. The investment houses have been pushing U.S. gold coins to the point where silver dollar sales slacked off. In fact, many clients began selling dollar rolls back to the investment firms, thus causing the overabundance of dollars on the wholesale market. With this sudden reversal, the big buyers became sellers and the suppliers, who thought rolls were like money in the bank, stopped buying altogether. The wholesale suppliers' inventories of dollar rolls were not only losing value, but in many cases reached the stage of being unsaleable.

Going from hot to unsaleable, common dollar rolls fell almost 20%, while 'S' mint rolls have fallen about the same percentage. As of this writing, the dramatically lowering of sell prices has slowed considerably, although, there is not a tremendous amount of support at current levels, as of yet. The stability of this market should be more identifiable in the next few weeks, especially with the Silver Dollar Convention just around the corner.

Added note: Original rolls or bags which have not been " cherrypicked" will still bring prices commensurate with the quality contained therein. This case is even more exemplified if the date is somewhat better, such as, 1898-O, 99-O, 1900-O, etc.

The U.S. gold market appears to be on a rampage. Prices continue on an incline, week after week. Major investment houses are stressing gold coins as being underpriced. With an increase in sales, thus leading to an increase in prices, brings about a decrease in supplies. As in any hot market, properly graded coins will become difficult to locate and there becomes a tendency to overgrade. Nevertheless, overgrading is not the exact problem. Coins with "eye appeal" for the grade are a major selling advantage. For example, a true MS-60 $1 TII with excessive bagmarks may sell for only $3500. But, a super clean AU or "slider" may bring as much as $5500 wholesale. "Eye appeal" may be the bottom line. As such, this is the hottest this market has been for many years.

This Week's Market

CENTS: BU Lincoln rolls continue to be sluggish. Supporters of this market are few and far between. Some weeks ago 1960-P sm.dt. rolls were difficult to locate as at least one bidder needed as many as 15 rolls. The last week has seen three different sellers with almost that many available and at lower levels. There has been some activity in circulated rolls of semi-key Lincolns: 1911-S, 1912-S, and 1913-S. Offers to buy are usually at bargain-hunting levels.

NICKELS: BU Jefferson rolls are no more active than Lincolns. There are rarely any buys and the few sells are usually under bid.

DIMES: Original Mercury dime rolls see persistent bidders week after week. Buy prices range from bid to ask with just a few bargain hunters who usually end up empty-handed. Occasionally, partial or put-together rolls are sold at discounted prices. This week finds 1944-S, 45-D, & S rolls all bid at a higher $705 per.

BU Roosevelt dime rolls are not getting alot of bidder support, except 1955-P & S, but, there is a lack of sellers at lower bids. This is probably the only reason bids remain stable at this time.

QUARTERS: Like Roosevelt dimes, BU Washington quarters, are not receiving constant bidding activity. The only roll with a higher bid is the 1955-D at $215. Apparently, those dealers with BU rolls of various dates in inventory are not yet willing to offer them at lower levels.

HALVES: The prolonged search for original Walking Liberty halves has not slowed one bit. Buyers maintain their bids for rolls and singles. Some dealers are even able to put together rolls and sell them at current roll bids. The catch is, the coins must still be original and matched. Buyers of rolls are not foolish enough to buy "sliders" or unmatched rolls at the current bids.

BU Franklin halves are being neglected for the time being. The 1948-D and 51-S are lower as some sellers attempt to reduce inventories of these dates.

DOLLARS: Carson City dollars are on several want lists in MS-64 & 65. Bidders will take quantities at higher prices, although, MS-65's are very difficult to locate in any quantity more than one or two.

PROOF SETS and MINT SETS: There has been a definite softening in demand for proof sets from 1956 thru 1964. The 1961-64 sets are very weak as bid has dropped again. Late-date sets are mixed with very few changes.

COMMEMORATIVES: XF/AU commems remain active at current levels. MS-63's are mixed with about as many sellers as buyers. MS-65's are once again experiencing higher bidding as attempts are being made to satisfy extensive want lists. For issues which dealers feel are still underpriced, they will stretch just a little on price and in some cases may not be quite as selective.

Olympic $10 gold coins are beginning to soften after prices had advanced so quickly. The number of buyers has declined, while more and more sell prices are being monitored.

TYPE: Judging from recent information, it seems that some buyers of MS-63 type coins are just as fussy as the buyers of MS-65 specimens. According to some sellers, the buyers of MS-63 coins are overly selective. So where does it all end? Wanted: Perfect VG Bust Dimes ????

GOLD: If one were looking for plus signs this week, this is the series. Virtually the whole gold series is in demand at higher levels. The demand outweighs the supply as this continues to be the strongest bid area of the market. The investment houses have done a superior selling job on their clients and now cannot get enough to satisfy their orders. Until silver dollar rolls begin to heat up again, this looks like the market to be in.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $326.50 per ounce.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (EXTREMELY FINE) Will have even overall wear on the entire surface of both sides. Some or all of the mint luster will remain in recessed areas. Hair lines are mostly worn away, but will be clearly evident under magnification. All design details will have sharp edges.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. Should have full mint luster. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

GUARANTEED GENUINE AND EXPERTLY GRADED

The guarantor of AUTHENTIGRADE® coins has been a leading wholesale professional numismatic company for over two decades, supplying over 40 million dollars worth of U.S. gold coins a year to numerous dealers, banks, investment advisors and financial planners. The guarantor has served as Official Appraiser to the State of California since being appointed by the State Controller in 1978.

Numismatic experts Ronald and Dennis Gillio examine more gold coins in a week than most dealers see in a year!

THERE ARE NOW SIXTEEN WAYS TO PURCHASE AUTHENTIGRADE® COINS

Available for immediate delivery are the two largest gold denominations produced by the United States — the Twenty Dollar "Double Eagle" and the Ten Dollar "Eagle". The impressive Double Eagles can be acquired in the early Liberty Head type (minted from 1850-1907) and the beautiful Saint-Gaudens type (1907-1932). The scarce Eagle types are offered with the Liberty Head design (1839-1907) and the Indian Head design (1907-1933). All AUTHENTIGRADE® coins are strictly Mint State, expertly graded according to conservative industry standards.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65---but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck ---and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins These usually average MS-63- -but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

STACK'S AUCTION SHOWS COLLECTOR IS ACTIVE

Conventions Active, But Fresh Material Lacking

The Market in Depth

What a way to celebrate a 50th anniversary. The recently held Stack's 50th Anniversary Sale commemorated 50 years of doing business as a Rare Coin Public Auction company. The sale in itself had a host of magnificent collector coins, many of which cannot be duplicated by grade. The Jimmy Hayes portion realized over $1.3 million for a mere 128 lots. The balance of the first session, including the Carl Zelson Collection, brought $938,415. The second session brought over $2 million. Included in this session was the Primary Bartle Collection. Total price realized for both sessions was $4,346,099.

The Jimmy Hayes Collection featured a 1794 Silver Dollar in Mint State at $220,000. This was followed by a 1795 Bust Dollar in Proof-65, which realized $143,000. Other highlights include a 1796 Dime in Proof-65, $44,000; an 1804 Bust Quarter in "Gem BU", $57,750; a 1794 Half in "Choice BU", $60,500; and an 1866 Seated Dollar in MS-67, $31,900.

The 50 piece type set of silver commemoratives was delightfully colorful and original. All but 6 of the coins were graded MS-65 or better. We only graded 4 coins less than MS-65. MS-65 bid for a 50 piece set is $68,560, while the Hayes set sold for a total of $84,524. This fact alone should be an indication of how rare true MS-65 commems are. If one has plenty of time and money, as did Mr. Hayes, it is still difficult to assemble all gems.

The second session of the Stack's Auction provided many superb proof sets from 1858 to 1891, with possibly the nicest 1882 set (1¢, 3¢ nic., 5¢, 10¢, 25¢, 50¢, Morgan and Trade $'s)imaginable, realizing $33,000. An 1802 Bust Dollar in MS-63, brought $20,900. A large portion of this session was filled with U.S. gold, of which many rarely seen dates were included. An 1879 Flowing Hair Stella in "Gem Brilliant Proof", was hammered down at $49,500. All the superlatives one could write may not do justice to the "Ultra High Relief", 1907 Twenty Dollar Gold. This specimen is a Roman Finish Proof 67 and realized $220,000. And to top this, an MS-65 1927-D $20 St. Gaudens brought a tremendous $275,000.

The list of highlights is rather extensive, but briefly:

Denomination	Cataloguer's Grade	Price Realized
1792 Half Disme	MS-67	$57,750
1796/5 Half Dime	Ch. BU	$50,600
1853 A/R Quarter	MS-65	$14,850
1917-S TII Quarter	MS-65 (Better)	$ 6,050
1807 Bust Half	MS-65	$11,000
1836 Reeded Edge Half	PR-65	$19,250
1839 No Drapery Half	MS-65	$19,800
1882 Morgan Dollar	MS-65 P/L	$ 2,310
1885 Morgan Dollar	MS-65 P/L	$ 2,530
1903-S Morgan Dollar	MS-65 P/L	$17,600

The Fourth Invitational Arizona Coin Convention and The Denver Coin Extravaganza butted heads on the same weekend, however, it appears that both shows met with success. Although the overall business has a lacklustre appearance, both shows are first class and drew many dealers, many with extensive want lists. Despite market sluggishness, due mainly to a lack of fresh material, the usual hard working dealers did a good amount of business and probably made a well-deserved profit. The dealers that buy and sell U.S. gold were kept extremely busy as this area continues to advance. Many dealers feel that most denominations are not rare in MS-63 on down to AU (merchandise is available), but demand is very strong, thus forcing prices up. Many of the major investment houses continue to offer this series and their marketing is quite extensive.

This Week's Market

CENTS: The little support this area sometimes receives is obviously silent at this time. There is a substantial list of dates on the decline; check page 3.

NICKELS: BU Jefferson nickels are a mixed group. Several of the war nickel rolls are lower, while a few of the earlier dates have increased. Those receiving higher bids are 1940-D, S, 41-P, and S.

DIMES: As is usual, original rolls of Mercury dimes are needed at current levels (not often found), but Roosevelt dimes are stagnant at today's prices. Bidders are bargain-hunting, but sellers are not visible at this time.

QUARTERS: BU Washington quarters only see occasional bidders for a very limited number of dates. This series, overall, is very stagnant. A couple dates have been offered at reduced prices: 1941-P and 58-P.

HALVES: Original Walking Liberty halves seem to be getting more difficult to locate as the prices increase. Gem singles continue strong in the bid/ask range, while rolls are advancing for all the 'P' mints from 1940-47. The same cannot be said for BU Franklin rolls, which are beginning to show weakness, if not in the whole series, at least for various dates. Please check page 3.

DOLLARS: Common date MS-65 dollars appear to be very stable at current levels. The usual buyers of these coins state, "there aren't many available, however, when they are offered in the bid area, I buy them".

As for original rolls of Morgan dollars, the same cannot be said. Rolls continue to be offered at discounted prices. The important factor here is the market is not stagnant. Dealers are well aware of this trend and are not just sitting, they are doing business at the lower levels. This was the case at The Arizona Convention. One interesting note: Original Peace dollar rolls are not available in quantity at current bids. Rolls being offered may be nice, but they are usually put-together. Strictly original "unpicked" rolls of Morgan or Peace dollars will command premium prices.

PROOF SETS and MINT SETS: There is a continuous run of minus signs for 1956-63 silver proof sets. Most buyers now appear to be in a bargain-hunting mood.

COMMEMORATIVES: As an indication of how strong the commemorative market is, in the Stack's Auction (Hayes Collection) 17 coins brought at least 3 times MS-65 bid. XF/AU commems find buyers at higher levels, with the in-between grades, MS-60 and 63, still mixed as buyers and sellers trade at current levels.

TYPE: Many of the recent higher buyers are no longer as active as they were. Some dealers feel that MS-65 type coins are overpriced, but they don't have much to sell. The fact remains that there is not much available at current levels, if properly graded.

GOLD: Extremely active! Every dealer is a buyer. Every seller wants a premium for his supply. Coins with the "right" look can easily sell at a higher grade. MS-65 coins are still not plentiful and nice in-between coins will command middle grade money.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $326.75 per ounce.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem"
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (UNCIRCULATED) Strictly uncirculated sterling with a degree of rub or wear. Further qualifications are necessary. A well struck coin may not have full luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. Should have full lustre. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63—but with the additional feature of deep mirror prooflike surfaces both sides.

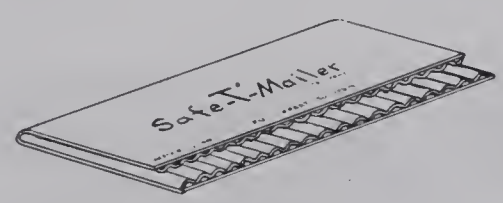
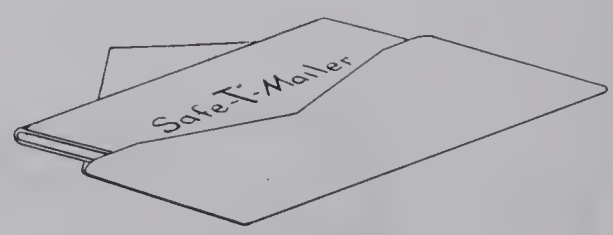
THE MAILER OF 1001 USES!



Originally designed by a leading numismatic dealer for mailing coins, medals, paper money,and other numismatic material, Safe-T- Mailer is the perfect means to simplify mailing small objects. It's ideal for mailing refunds...parts...dental instruments...you name it.

SIMPLE TO USE!



Safe-T- Mailer consists of a single sheet of corrugated board coated overall with an adhesive that sticks only to itself. It will not stick to paper, plastic or metal. Objects to be mailed are placed on the sheet, the sheet is folded along the score line and pressed together. It is then ready to be inserted in a standard size envelope,and mailed. No staples or other fastenings are needed. Objects may be loose or in a plastic, paper or metal holder.

1. Place material on sheet as flat as possible, leaving at least $\frac{1}{8}$inch on each side for sealing.

2. Press firmly all over - particularly at the three open edges.

3. Place in envelope and seal.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins These usually average MS-63- -but may also include some MS-60 and MS-65 examples For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

the COIN DEALER newsletter

. . . a Monday morning report on the Coin Market

Vol. XXIII No. 45 | November 8, 1985 | Single copy price: $3.50

EYE APPEAL GOLD . . . . RAGING!!!

Silver Commem Market has Broad Base

The Market in Depth

If clients of the big investment houses stop buying or if they shift their demands from one series to another, what will happen to the once hot, but now neglected series? If other dealers do not support this series, it will inevitably begin to fall. If clients start to take profits, thus dropping large numbers of product on the market, there becomes such an overabundance of material that the market cannot absorb it all and prices will fall like a rock. This was the case recently with original BU rolls of dollars. Many investment houses began to recommend U.S. gold coins for investor portfolios. Their marketing efforts were so strong that investors began selling dollar rolls in order to purchase U.S. gold. The results were as obvious as "Monday morning quarterbacking". U.S. gold has risen markedly, while original dollar rolls have fallen dramatically.

As is usually the case, as time passes, progress is made. Some call it a "changing of the rules". We wish to emphasize the definitions so dealers will understand what our prices mean. In this manner, we may all speak of apples, instead of, trying to compare apples to oranges. One of the biggest problems in this industry is trying to get everyone to use the same terminology and having it mean the same to all. If, when definitions change, all understood, then we'd all be dealing from the same knowledge and we would not have as much problem with interpretation of the aforementioned terminology. But, while all coins are not created equal, neither are all dealers. So, dealers will tend to define terms in a manner that best suits their own business. But, in so doing, a conflict may arise as to the understanding of these terms which may mean two different things. Confused? Don't be. Just realize that this industry is based almost entirely on subjectivity, define your terms consistently for both buying and selling. Progress will be made. Some semblance of standardization will be reached, although, maybe not as cut and dried as 2 + 2 = 4.

What is the meaning of the prices for original dollar rolls? Our definition is: "Prices are for typical original rolls which generally average MS-60 to MS-63". In the past (last year and prior), one could expect to find anything from MS-60 to MS-67's in an original roll. But not anymore. Prices for gem coins have risen so dramatically that dealers have "cherrypicked" the original rolls to the point where one can find only MS-60 to MS-63's in the rolls; and not very many 63's. One might argue that rolls which have been "cherrypicked" are no longer original. Well, if one locates a mint sealed (?) bag of Morgan dollars and picks out the 500 best coins, are not the balance of 25 rolls original? Or, let's take it one step further. If one has five original bags of the same date and cherrypicks the best 2000 coins, aren't the worst 3000 original? When put into tubes, the rolls will match.

A few more years into the future may find original dollar rolls nonexistent. As with most other series of coins dated prior to 1940, original rolls are rarely traded. And as the prices of MS-65's increase, the likelihood of rolls being "cherrypicked" exists. So, when it gets right down to it, every single coin must stand on its own merits. Yes, original Morgan dollar rolls, MS-60-63, have suffered tremendously, lately. Put-together rolls of MS-60's are only worth MS-60 money. But, unpicked or premium rolls are still worth the sum of their individual value. Some dealers have even begun qualifying the rolls they wish to purchase by specifying the number of MS-63's that must be in the rolls.

This Week's Market

CENTS: This week found buyers and sellers of 1960-P sm. dt. BU rolls active at the $75 level. The rest of this BU roll series remains stagnant.

NICKELS: Once again, BU Jefferson nickel rolls are somewhat mixed. A few sporadic dates are higher, while some war nickel rolls are lower along with the 1950-D roll. The BU war nickel roll set is now bid at $2350.

DIMES: BU Roosevelt dimes are extremely neglected at the present time. The only visible buyers are at discounted levels. Original roll sets (1946-64) are now bid at $8050.

QUARTERS: BU Washington quarter rolls are as inactive as BU Roosevelt dimes. There are no reported buyers of rolls at current levels on a consistent basis. Gem Washington quarters are finding a few more buyers at current levels. These dealers apparently feel gems are underpriced.

HALVES: Walking Liberty halves continue to top a number of dealers' want lists, either as gem singles or original rolls. Some dealers report that they can't even find "rips" at various small shows. They have to pay right at current levels in order to purchase the coins that meet their strict standards.

Late-date Franklin rolls are beginning to suffer some setbacks. Bid has fallen on rolls from 1960 thru 1962, P & D mints.

DOLLARS: A few Carson City dollars in MS-63 are higher as are the 1884-S, 92-S, and 96-S. There are very few changes in the MS-64 and 65 columns as this area continues stable at current levels. Original BU dollar rolls have taken a breather this week from their discouraging weekly declines. Remember: Our bids are not for put-together rolls. They must be original, MS-60-63's. Any additional qualification as to grade will make the rolls worth more or less.

PROOF SETS and MINT SETS: Silver proof sets (1957-63) are getting very little support at current levels. 1961-63 sets are at a lower $16 bid.

Mint sets are somewhat sluggish, although most bidding is at or near current bids.

COMMEMORATIVES: Along with U.S. gold and W.L. halves, gem commemoratives are extremely active in the bid/ask ranges and for several issues even higher. Activity remains consistent for XF/AU commems at current levels. Commem gold, although stable, is being ignored for the time being as dealers concentrate on more profitable areas.

TYPE: Some dealers are of the opinion that MS-65 type coins are not trading on a consistent basis because there is very little fresh material on the market. Others feel some issues are overpriced and need to "correct" somewhat. We checked with several dealers who buy and sell strict graded type and the majority agreed they would buy most, if not all, of the silver type coins in mint state and proof, if they were properly graded, at current levels. They have seen very few coins lately that qualify. Most coins being offered are just nice MS-64's.

GOLD: Mint state 60 and 63 U.S. gold persists at higher and higher levels. Demand is a very strong factor in this area and it is cautioned to use strict grading just as consistently as when this market is not so active.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $325.00 per ounce.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (EXCEPTIONALLY POOR to BARELY UNCIRCULATED) Any imperfections, such as nicks or rim bruises, evident without magnification. Impairments of eye appeal may be present. Any degree of wear.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. Should have full luster. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same chereteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63 -but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

GOLD TYPE REACHING NEW HIGHS
BU Silver Rolls Under Severe Selling Pressure

The Market in Depth

Comparing U.S. gold coins to the price of gold bullion is almost like comparing a lake to an ocean. Yes, they are similar in character, but the volume of water is considerably less in a lake, just as is the case for the number of U.S. gold coins versus gold bullion. Nevertheless, a time comparison can be made concerning the market at the beginning of the year up to date. The following comparison shows bid prices for January 4, 1985 and November 15, 1985, in grades VF thru MS-65 for the most commonly traded coins in the 12 piece gold type sets. This does not infer that MS-65 coins are common.

As one can see VF and XF coins have remained relatively stable. The major exceptions are VF and XF $5 & $10 Indians, and $20 St. Gaudens, which have all increased since the first of the year. The prominent increases across the board begin with the AU grade thru MS-65 in all denominations. The lone exception being $20 Liberties in AU, which showed a decrease. In general, as the quality of the coin improves, the percentage increase is appreciably higher.

The Sixth National Silver Dollar Convention takes place this week in St. Louis. All of the nation's leading silver dollar specialists will be represented at the four day event. This will likely be a significant barometer of how the market will perform the rest of the year. Many dealers feel business will be slow until the FUN Show in early January. By the way, the ex-Wayne Miller silver dollar set is scheduled to be sold at public auction in late January, by Superior Stamp and Coin Company, Inc. The coins will be sold as singles and should create quite a stir among the silver dollar collecting community.

This Week's Market

CENTS: Various BU Lincoln rolls are appearing on several want lists. The increases are among dates between 1940-49. Several other dates are in demand at bargain hunting prices.

NICKELS: As has been the case the last few weeks, BU Jefferson rolls are mixed. War nickel rolls are consistently offered at lower levels for some specific dates. All the 1944 mints are lower along with the 1945-D.

DIMES, QUARTERS, & HALVES: Roosevelt dimes, Washington quarters, and Franklin halves have been combined this week as indicative of the fact that one major dealer, with a reputed strong position in BU rolls, is seemingly trying to force this market down. He constantly runs buy and sell messages, with many dates available at lower levels. Apparently, dealers believe the roll market is overpriced because bid buyers remain conspicuous by their absence. Roosevelt dimes have eight dates at lower bids. Washington quarters finds 18 different dates lower. While Franklin halves have seen seven dates falter.

DOLLARS: Of major concern to many dealers is the overall condition of the dollar market, especially as we go into the Silver Dollar Convention. Many feel that the MS-65 market is quite stable. MS-63 and 64 coins are somewhat mixed, while lesser mint state quality appears to be weak. This week should give us a good indication of where the original BU dollar roll market is headed.

PROOF SETS and MINT SETS: Both of these areas seem to be very quiet at this time. Dealers, who consistently run buy prices, will pay a little back of bid, yet, sellers don't appear too eager to be relieved of their inventories.

COMMEMORATIVES: MS-65 commems remain very strong, yet bids are relatively the same. Many dealers in this market voice the opinion that, even in raising their buy prices, coins cannot be located in the quantities needed. Bids have increased for many XF/AU issues.

TYPE: This area of the market is rather strange, to say the least. There are very few active bidders in any grade. Dealers seem to be waiting for the first of the year. Or, maybe, they are waiting to see what a couple of major dealers, who are apparently over inventoried in gem coins, are going to do. Much of their inventories are in coins that bid over $5000 and this price range does not fit nicely into investment packages.

GOLD: With the recent big push in U.S. gold coins, various companies offer different types of guarantees, and in some cases, these coins are sold with certification and/or grading papers. There are many "old line" and even more newly formed certification services. Depending on the reputation of the certification service, dealers may buy or sell these papered coins at over or under bid prices. Our prices, in any series, are not for papered coins. Our bids are for coins which meet strict standards for the particular grade category.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $323.00 per ounce.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices--particularly the pre-1941 issues. Washington rolls--dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 [illegible] ally sharply struck, but with no trace of luster or having barely any trace of luster. Surfaces may have moderate to heavy abrasions or contact marks, or be moderately to severely bagmarked or carbon spotted. Eye appeal may not have been considered.

MS-63 (CHOICE UNCIRCULATED) Will be sharply struck (may show only a slight weakness of strike). Should have full lustre. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63, but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63--but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

Gold Remains on Top of Want Lists

The Market in Depth

The Sixth National Silver Dollar Convention has come and gone. Overall, the show was a tremendous success as most dealers participated at whatever levels deemed necessary to transact business. The only real drawback seemed to be that many dealers feel that the overall market will remain somewhat slow for the rest of the year. Nevertheless, there were a few very active areas which left the majority of the dealers with positive feelings. To begin with, this show could have been sub-titled, the U.S. Gold Convention. U.S. gold continues very strong with no let up in sight. Most denominations consistently bring prices in excess of the current bid levels (MS-60 & 63). No matter how fast we update bid and ask prices, some of the marketmakers just raise their buy prices that much faster. This is a very broadbased market with many dealers involved at this time. Several dealers across the country feel that this market may run quite awhile. It is easy to see their point as millions of dollars are being spent at the wholesale level.

Original dollar rolls were not readily available at the Silver Dollar Convention. The ones that were reported in transactions brought prices commensurate with the quality of the total roll. That is, "the sum is equal to the total of its parts". As it stands now, several dealers are constant buyers of original rolls at the $675-$700 level. This does not mean that rolls are plentiful at these levels. Sellers, for the most part, demand $725-$750 for their rolls. On the other hand, mixed rolls or MS-60 singles are a difficult sale in the $30-$32 range. A number of dealers attempt to buy coins that grade a little better than MS-60 at the $30 level.

Although this convention had its share of "wonder coin" sales, there were not as many "wonder coins" sold as compared to recent shows. This is most likely due to a lack of this material being available since there are plenty of buyers of this top quality material.

McIntire Numismatic Auctions, Inc. presented a 2000+ lot of coins ranging from half cents to dollars, including commemoratives and gold. Over half of the lots were silver dollars, characteristic of the Silver Dollar Convention. The most noteworthy coin in the sale was a superb Proof-67 1895 Morgan dollar. It realized a possible record price $57,200. Other highlights are listed as follows:

Albany Commem	MS-67	$ 908.
Ft. Vancouver Commem	MS-63	$ 550.
1797 Bust $	XF	$ 2,365.
1804 Bust $ (DuBois Electrotype)	AU-MS-60	$18,150.
1869 Seated $	MS-67	$11,550.
1880-S Morgan $	MS-65 Cameo P/L	$ 1,073.
1880/9-S Morgan $	MS-65 Cameo P/L	$ 1,210.
1881-S Morgan $	MS-67	$ 714.
1883-O Morgan $	MS-65	$ 715.
1884-CC Morgan $	MS-65 ANACS	$ 798.
1885-O Morgan $	MS-65	$ 550.
1887 Morgan $	MS-65/65	$ 550.
1894-O Morgan $	MS-64/65	$ 4,620.
1897-O Morgan $	MS-64	$ 2,200.
1899-O Morgan $	MS-67	$ 769.
1900-S Morgan $	MS-65/67	$ 1,429.

This Week's Market

CENTS: After appearing uncharacteristically active last week, BU Lincoln rolls quieted back down this week. Changes were minimal as bid varies for only two dates.

NICKELS: BU Jefferson nickel rolls finds one particular bidder persistent in his quest for various dates. Otherwise, changes would be confined to lower bids. Although, only one minus sign appears for war nickel rolls, this series is still in the doldrums.

DIMES: Original rolls of Mercury dimes are still active at current levels. Several dealers are actively seeking MS-65 specimens. Even after MS-65's are pulled from rolls, put-together original coins may still command bid prices. Of course, sliders or dipped coins do not work.

BU rolls of Roosevelt dimes remain soft as several large deals were available at the Silver Dollar Convention. Many of the dates with minus signs this week were available at 5%-10% under bid.

QUARTERS: BU Washington quarter rolls are about as soft as Roosevelt dimes. In some cases, there were as many as 30 rolls available of a few dates.

HALVES: Several dates in the Franklin half series are lower as sell prices continually appear at lower levels.

There was definitely a lack of original rolls of Walking Liberty halves this past week. Several buyers are persistent at current levels, yet, sellers usually want over these strong buy prices. Gem singles are still difficult to locate and a few dealers are beginning to feel that the 1916-33 dates are underpriced.

DOLLARS: Carson City dollars are once again active in MS-60 grades (1881-85). Many common date dollars are now bid at $30 in MS-60. The good news is that several dates in MS-64 are wanted at higher levels. And although, some dealers don't believe in MS-65 dollars, strictly graded coins are not plentiful at current levels. Advanced bidding is the only slow characteristic here.

PROOF SETS and MINT SETS: There were no changes this week for mint sets, though common silver proof sets (1961-64) suffered further losses. The 4-5 major buyers of these sets are no longer supporting this market and many sets go unsold at discounted prices.

COMMEMORATIVES: Olympic $10 gold pieces continue to slide. When they were advancing week after week bidders could always be found. Now that they are retreating, bid prices are no longer in evidence, just sell prices.

MS-65 and XF/AU silver commems are strongly sought after in the current bid/ask ranges, while MS-60 and 63's are somewhat quiet at this time. A few dealers try to buy nicer 60 & 63 coins at these bid levels.

TYPE: There are very few changes this week in type. Many of the active bidders are concentrating on other areas of the market. Occasionally, a few strictly graded pieces of MS-65 type are offered, but for the most part, fresh material is lacking. A few low-profile dealers are still buying type at current levels, but they are not always visible.

GOLD: What can be said that hasn't already been written. U.S. gold is in a prolonged drive to higher levels. In most denominations, MS-60 and 63's are once again higher. The most popular coin at this time is the $20 St. Gaudens in MS-63. Overall, it is considered one of the most attractive coins the U.S. ever minted.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $324.00 per ounce.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices--particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

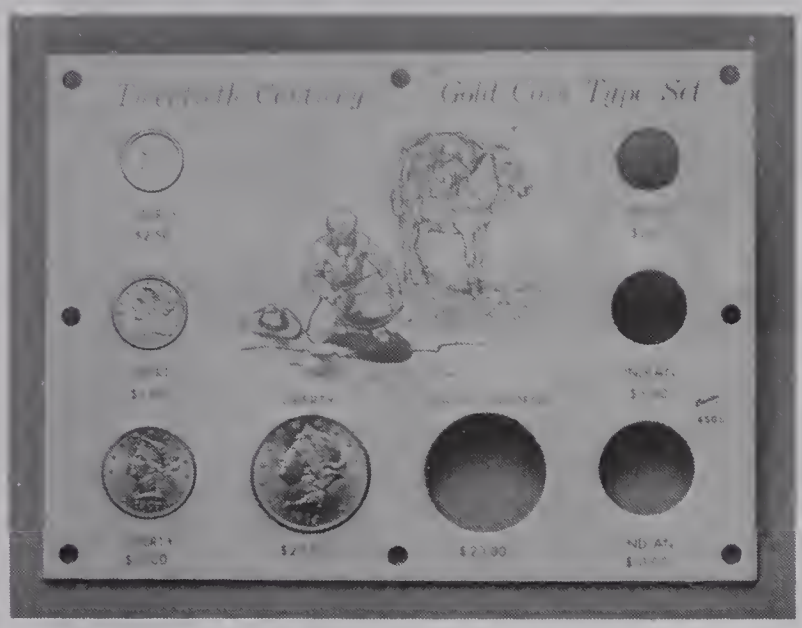
MS-60 (EXTREMELY FINE) Will have many bag marks, may show only a slight weakness of strike. Should have full lustre. These are well above average coins.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. Should have full lustre. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.



MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appealing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63, but with the additional feature of deep mirror prooflike surfaces both sides.

If you're not buying NCI coins...

you could be buying in the dark.

Things can get shadowy when you start talking coin pricing and grades. Buying NCI certified coins from one of the dealers on this page gives you the confidence you need when investing your hard-earned money – by including the first-ever insured authenticity certificate.

Each NCI certified coin carries an insurance policy to pay the owner the stated value, plus 15% per year, on any coin proven non-authentic. And if you're worried about unpleasant grading surprises should you ever decide to sell your coins, you'll feel better about NCI. As part of a special arrangement with the 1985 ANA Auctioneer – Heritage Numismatic Auctions – they will accept for consignment any NCI certified coin at the stated grade, for any Heritage-sponsored sale.

If a major insurance company and a major auctioneer have that kind of confidence in NCI, then you can see why more collectors and investors are turning to NCI coins – the coins they can buy with confidence.

Shed some light on the subject before you buy – call one of these NCI coin dealers today to see how you can get the insured certification of an NCI coin. Call Tim LaPointe at 800-527-9250 for more information.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usuelly average MS-63--but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

COIN SHOPS STOCKING UP FOR HOLIDAYS

SBA's Advance Under Strong Buying Pressure

The Market in Depth

We are quickly approaching that time of the year when the holidays take over most marketing strategies. While it is true that U.S. gold persists at higher levels and MS-65 dollars, commems, and walkers are still in strong demand, it is also true that this time of the year turns toward more specialized buying and selling which is more concentrated toward gift-giving. This leaves one with the feeling that the overall rare coin market is somewhat slow, which does appear to be the case for many coin shops across the country (but most of the coin shops will thrive for the next month---this is their busiest time of the year). Even some of the dealers who go to coin shows feel this slowness, but, the investment houses, the middle wholesalers, and the work-aholics, those who are in the middle of the specialized strong areas, remain very busy. There are a few major coin shows remaining on this year's circuit, specifically, Michigan State, Las Vegas VIP, and Dallas Coin & Stamp Expo, among a few others, which should keep many dealers quite busy.

Nevertheless, for the next month, most of the action for shop owners will be in gold coins, jewelry, proof and mint sets, late-date sets (Kennedy, Ike, and Anthony) and various key date coins needed for completing sets. These areas make up the predominance of trading over the last week. Several dealers are seen offering to buy late-date proof sets at bid levels, just to stock up, but most of their buys go unanswered. The same can be said for S.B.A's as a number of dealers are trying to buy sets in the bid/ask range. The 1979, 80, and 81 proof dollars are very active and popular at this time.

More and more dealers are using terminology such as, strictly, properly, and others when describing the full grade coins they wish to buy. They want no-question graded coins, not borderline or commercial grades that may not make the grade in the future, but solid grade coins. This is the terminology being used by many dealers who are concerned with their reputation and feel, in order to keep it in tact, they must be able to buy back coins in the future, at the same grade they sell them today. Along with this same line of thinking, many dealers are trying to buy split-grade coins. For example, commems, U.S. gold, and type coins are being sought which are nicer than MS-63, but not as nice as MS-65. Some call these coins MS-63+, while others simply describe them as MS-64. However one wishes to describe these coins, it is apparent that many dealers are trying to deliver a quality product at fair value.

Although, this is not always the case. We have received complaints of late concerning overgrading and/or overpricing. This industry is no different than any other when it comes to improprieties. It is the job of all legitimate coin dealers to deliver fair value and to attempt to correct situations whereby the public is harmed intentionally. Secondarily, it is the responsibility of the public to educate themselves, check out a dealer's reputation, do not deal with a coin company that does not have an experienced numismatist. If we all work toward this end, we can watch the growth of this very viable industry.

This Week's Market

CENTS: One dealer continues to buy 1911-S and 1912-S cents; singles or by the roll. He is not overly grade conscious, but wants roll quality coins. Also, aside from two specific BU Lincoln rolls, at higher bids, this is still a sluggish market.

NICKELS: This week finds several BU rolls at higher bids as one dealer tries to buy his favorite dates. Nevertheless, the balance of this series is very much ignored by the majority of coin dealers. There may be rolls that are underpriced, but it will take some convincing before this series really takes off.

DIMES: Original Mercury dime rolls are actively pursued at current levels, with two dates, 1938-D & S, wanted at a higher $1700 per. The same cannot be said for BU Roosevelt dime rolls. Bidders are not very active and when bids are seen they are usually at "under bid" levels. The 1955-S roll has fallen to $68 bid.

QUARTERS: The only consistent buy prices monitored this week are at bargain-hunting levels. Interest is lacking, but sellers do not seem too intent on giving merchandise away. Even though this series is not very active, material is not readily available at most coin shows.

HALVES: Original Walking Liberty half dollar rolls are elusive. Very few are offered on teletype and not many can be found at coin shows. If any rolls do become available at reasonable prices, most dealers would buy them immediately as they are aware of the higher buyers. Bid has increased for many of the mintmarked dates from 1941-46.

DOLLARS: MS-65 dollars top a few dealers' want lists at higher bids. Carson City dollars are especially popular and are easy sellers if priced according to grade. Minimum bid on MS-65 dollars is now $500 with a few other dates also showing increases. 1984 and 85 ANACS graded dollars, in MS-65, which had commanded large premiums over bid, have now settled back to where some dealers consistently offer to buy at current levels. The main reason premiums have corrected somewhat is that, supplies, although not plentiful, are now fairly equal to demand.

PROOF SETS and MINT SETS: Silver proof sets (1956-64) are receiving no visible support at current levels. Thus, a rash of minus signs can be found on page five. Most offers to buy are being heavily discounted. The 1970-S sm. dt. proof set is up to $80 bid.

COMMEMORATIVES: Several dealers have jumped on the bandwagon in an attempt to buy MS-63 and 65 silver commemoratives. MS-63's are being sought at or very near current levels by at least four additional market makers. Gem specimens are in very short supply and several issues are higher this week.

TYPE: In general, type coins are at a standstill. A few dealers continue to try and buy MS-65 coins at current levels. Several dealers are buyers within 10% of bid. There are not enough true graded 65's around to satisfy the buyers at today's levels. Obviously, any large fresh deals would stimulate this market.

GOLD: The Bay State Coin Show was very active in this area. Higher prices are bringing some additional merchandise into the market, but it seems demand is still outdistancing supply. This week indicates small denomination gold is higher in MS-60, while various denominations are higher in MS-63.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $332.00 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

$35.00 per column inch, 2 column inches maximum

Advertising space is limited, ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (UNCIRCULATED) Will have many bag marks, may show only a slight weakness of strike. Should have full lustre. These are well above average coins.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. Should have full lustre. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely better than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

"YOUR NEWSLETTER IS JUST GOSSIP. I DON'T WANT THIS!"

That's one man's opinion of a recent issue of the Bruce Amspacher Investment Report. I thought a few other opinions might interest you, too.

"Is there some way you could make the BAIR a weekly? Ten times a year just isn't enough! I love it."
—A well-known Washington dealer

"We think your newsletter is the best because it's really fun."
—An Arizona collector/investor

"Your newsletter has more solid information and less hype in it than any of the others. I should know, because I subscribe to them *all*."
—A California dealer

"I find the BAIR to be both informative and extremely well written. You are a quite literate fellow."
—An Illinois investor

"The BAIR is great! Bruce Amspacher is one of the sharpest coin minds in the country. He is also one of the best writers in the coin industry. I urge you to give Bruce a try."
—David Hall

"I highly recommend the BAIR. Written by one of the great minds in the business."
—Robert G. Allen
author of "Creating Wealth"

"I have found the BAIR to be truly informative, interesting, and enjoyable."
—A California collector

"I told my employee that if he took the BAIR home again before I had a chance to read it, he'd be out on the street. So what happened? My dad took the next two issues before I got to read them. I give up!"
—An Oklahoma dealer

"Your ability to pick winners in the numismatic marketplace is absolutely amazing. My husband and I have subscribed since the first issue and we wouldn't be without your publication."
—A Georgia investor

"We got tired of fighting over the BAIR and decided to order two subscriptions. It's worth it."
—A California dealer

"We take two subscriptions in order to keep peace when the BAIR arrives. I'll bet no one else is that crazy or extravagant."
—An Ohio investor

"Bruce Amspacher [is the] finest of newsletter writers."
—David Ganz
Coin Market Insider's Report

"When the BAIR arrives, everything else in the office *stops*. It's funny, informative, and extremely well written. You are without question the best numismatic writer around."
—A New Hampshire dealer

"This is a little note to express my satisfaction with the scholarly presentation [of your publication]. There are many besides me that take our hats off to a pro."
—An Ohio collector

"I continue to enjoy each issue as it arrives."
—Q. David Bowers

"I'll vote for the BAIR as the best on the market. I have learned more about coins through you than I did on my own in the 20+ years prior to your acquaintance."
—A Virginia collector/investor

"It's incredibly innovative, clever, and well written."
—A Louisiana dealer

Is the BAIR *really* that good? There's a *good chance* you'll think so. If you'd like a sample copy, just write or call 1-800-821-3985.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same chereceristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63--but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

SILVER COMMEMS ATTRACTING PLUS SIGNS

Need for "Eye Appeal" Gold Remains Strong

The Market in Depth

As this year draws to an end, we see that it is not unlike past years. Characteristically, after the August ANA and various well publicized auctions, vast amounts of money have changed hands for rarities which will be taken off the market. Most importantly is the fact that millions of dollars are temporarily removed from the marketplace and there is a tendency toward a "wait and see attitude"---what will get hot next? While it is true that U.S. gold is dominating the market's activity, the overall condition of the rare coin industry appears slow. But, is the market weak, or is this a time of buying opportunities?

The answer to the first question is some areas are weak, while others are just soft (there is a difference). But first, what portrays weakness? Weakness is exhibited when a series is ignored, or buyers are very few and far between. Also, if the few acknowledged buyers limit their purchases or buy at discounted levels. Most importantly, in a weak market or series, there are very few participants. This is the case for some specific areas of the market: BU Lincoln rolls, BU Jefferson rolls, circulated Lincoln cents, Jefferson nickels, Mercury and Roosevelt dimes, Washington quarters, and Walking Liberty halves. With the exception of a few specific dates, all of these series depict weakness. It seems that the only way these series will turn around will be with a much stronger collector base.

The difference in weak and "soft" is a matter of how many players there are. Weak markets find very few players, while soft markets find many players taking advantage of lower prices and weak sellers. This is what the smart money must decide: Is the market weak or soft? A soft market creates buying opportunities. Now, assuming most sellers have already made a profit, buying is the exact instance at which time the buyer puts himself in a position to take future profits. If one buys in at the top of a market, one may have to hold for a longer period of time in order to realize a profit. Or, if one buys commercial grade or borderline coins at today's levels---which are for no-question graded coins---one may never realize a profit. But, the astute knowledgeable dealer is now taking advantage of those areas that may be soft. Sure, the investment houses continue doing well with U.S. gold, MS-65 commemoratives, dollars, and walkers; that's because they have thousands of customers for this material. And although not plentiful, there is enough of this material available to just about satisfy demand.

What of the dealers who choose not to participate in the most active areas of MS-65? The biggest percentage of the business done by dealers is in coins of less than MS-65 quality. Why?Because a very minute percentage of coins fall into the MS-65 or better category. This is the reason "65" prices attain their levels. Some people desire the best and are willing to pay for it. Others, just as astute, follow another school of thinking which believes that coins grading less than MS-65 can be extremely profitable if strictly graded. Both directions can be correct. The MS-65 buyer risks more capital and it has paid off in many cases if he has bought properly graded coins. The MS-63 buyer is more conservative. He will probably not make as much, but his risk is minimal.

Weak, soft, active, strong, whatever you feel the market is, remember, it takes all the different types of buyers and sellers to make up the rare coin industry.

This Week's Market

CENTS: BU Lincoln rolls remain unchanged as bidders are few and far between. Miscellaneous mixed lots are offered occasionally, but buyers are difficult to locate. A few specific dates have been sought at current levels, but these want lists are limited to two or three dates.

NICKELS: Stagnant. The perfect description for BU Jefferson nickels. This series is receiving very little attention; bargain-hunters cannot even be found.

DIMES: Unlike the last few weeks, this week finds mixed activity for several BU Roosevelt dime rolls. The 1948-P and 53-D rolls are higher, while the 1955-D & S rolls are now bid lower. A few other dates were active at bid.

QUARTERS: Several dates in the Washington quarter series are at least active again at today's bid levels. Nevertheless, bidding for BU rolls is only occasional at best. The 1958-P pulled a reverse from last week and is now higher at $152.50. The 1943-S roll and 55-D are both lower.

HALVES: BU Franklin rolls are somewhat stable at current levels after exhibiting some weakness the last few weeks. The 1958-P roll is wanted in bag quantities. The 1954-D is the only roll lower.

Original rolls of Walking Liberty halves remain consistently active; a few rolls were offered this week within the bid/ask range.

DOLLARS: There are very few changes this week in the Morgan and Peace dollar series. There are mixed feelings as to the strength of the entire series, but the fact remains that business is being done in all categories. The usual buyers for MS-64, and 65 are still active at current levels. The under bid buyers remain active as well. Original dollar rolls are gathering strength even though some sellers can be found within current ranges.

PROOF SETS and MINT SETS: Occasional buyers can now be seen for silver proof sets (1956-64) at bid levels. Earlier sets are less active, but stable, while late-date sets are wanted for the holidays.

Mint sets are mixed as buyers and sellers meet at current levels.

COMMEMORATIVES: Several dealers are still of the opinion that MS-65 silver commems are underpriced. They are strongly sought after and it is hoped that higher bids will help locate satisfactory quantities. There are numerous plus signs in the XF/AU column also. There are several buyers of MS-63's at current bids.

The $10 Olympic gold coins are currently trading within the bid/ask ranges.

TYPE: Type coins are seemingly soft in all grades, yet the lack of activity is quite characteristic of this time of year. The high buyers of MS-65 maintain they will still buy properly graded coins at bid prices. The Type I Standing Liberty quarter in MS-63, which is currently bid at $500 for "full head" is considered to generally come with a "full head". To prove this point some dealers will pay $500 for 1917 Type I quarters even if they don't have a "full head".

GOLD: The plus signs are not as plentiful this week, but the market remains just as active. MS-60 and 63 gold is consistently strong at today's levels as the investment houses continue to buy in large quantities at major coin shows. The only real softness is in $20 gold pieces, AU and lower.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $323.00 per ounce.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem"
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark--these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls--dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (UNCIRCULATED) Strictly uncirculated coins with evidence of rub or contact, however no further significant evidence of wear. Often bag marked and/or weakly struck. Baggy luster is rare.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. Should have full lustre. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

This highly informative and easy to understand report by RAY MERCER takes you on a step by step journey through the process of learning how to skillfully grade your coins. In depth topics include detailed explanantions on luster, strike, die definition, focal points, detracting marks, die abrasion, eye appeal, and toning. Dipping and cleaning are frankly discussed along with the need for proper lighting and the absence of stress. Guaranteed Gold - Is This The Future?

The Market in Depth

Over the past year, several rare coin companies have begun to market U.S. gold coins with guaranteed authentication and grading. These companies exhibited the foresight to see what possibilities existed with papered coins such as ANACS certifies. Dealers feel the major drawback with ANACS is they do not buy and sell coins, so there is no guarantee. But, this is not their function, they are unbiased and sell only an opinion. It was not intended as a marketing tool, although various coin companies do now offer buy/sell spreads for ANACS graded coins. ANACS certified coins may be guaranteed by individual coin companies, not ANACS.

In order to benefit from lessons learned, several companies have instituted a guaranteed buy/sell U.S. gold coin program. Individual companies may have different names for their program, but their results are basically the same: They guarantee grading and authenticity for U.S. $10 and $20 gold pieces. They publish a buy/sell spread, on a daily basis, at which their customers may buy or sell the individual company's coins. The coins are separately contained in a heat-sealed package.

There are several companies offering this product and service. Not all of them are as actively traded. The two most visible companies are A-Mark Precious Metals, Inc. "Guaranteed Gold Coins" and Ronald J. Gillio, Inc. "AuthentiGrade". These two companies only sell to their recommended dealer clientele, who then may sell to their customers. With guarantees such as these, one can see that there may be premiums on these coins above our weekly bids and coins may be traded blindly (that is, without seeing them), based on the description on the holder.

We have undertaken the task of listing these two companies' buy/sell spreads for the week of 12-2-85/12-6-85. The idea is to indicate premiums; for exact prices one must contact one of the recommended dealers. In conjunction with this comparison, we will also list bid ranges for ANACS and NCI coins. The last two must be listed as ranges for there are some large spreads depending on the dealers from whom one receives blind quotes.

More and more companies will enter this guaranteed market in the future. The most reputable, the strongest will survive.

This Week's Market

CENTS: BU Lincoln rolls remain somewhat neglected, although a few dates did experience minor changes. Ch BU 1983 double die cents are receiving a little more attention recently. One buyer will pay a minimum of $100 for up to 10 pieces. One seller of ANACS graded coins offers the following prices: MS-60/60 @ $135, MS-63/63 @ $175, and MS-65/65 @ $265.

NICKELS: There seems to be some added interest for Buffalo nickels in various circulated grades. Most buy prices are within the bid levels. Original rolls are not frequently encountered, but will change hands at current levels when found.

BU Jefferson rolls have a few changes this week, mostly of a positive nature.

DIMES: The Monthly Summary indicates numerous price advances for MS-65 Mercury dimes. The number of buyers for this series has increased markedly over the past three weeks.

BU Roosevelt dimes are steady at current levels except for a couple of minor changes to the downside: 1954-S at $73, 1958-P at $68.

QUARTERS: BU Washington quarter rolls finds a couple dates at lower levels, but for all intents and purposes, the market is stable. At this time, very few rolls are offered at bid, let alone at discounted levels.

HALVES: Gem BU common date Walking Liberty halves have jumped to a new higher bid of $365 per. Original rolls are solid at current levels and some dealers are willing to pay even higher for the right deals.

BU Franklin rolls are most active in the later issues (1960 and after). Again, not many rolls are being offered at reasonable levels.

DOLLARS: MS-63 Carson City dollars are consistently in demand by several different dealers around the country. This week finds several dates at higher bids. In MS-64, the 1881-CC thru 1885-CC are also higher. MS-65 dollars, although not advancing, are still wanted at current bids. The high buyers are purchasing just enough material to satisfy demand.

PROOF SETS and MINT SETS: The majority of proof sets are active at current levels, although some dealers will pay more for various dates. The problem here is they want gem spot-free sets, meaning proof 65. Mint sets are also active at current levels with just a couple exceptions. There seem to be an awful lot of 1981 Mint sets available at lower levels.

COMMEMORATIVES: Gem commemoratives continue in an elusive state. Several bidders are willing to purchase much more than is available. Prices are not an issue, properly graded coins are.

TYPE: In the December Monthly Summary, you will find that bid has jumped all the way to $500 for TI 1917-P, D, & S Standing Liberty quarters in MS-63. Through extensive research and communication with many dealers, we feel that, in general, Type I's come with full heads. It would certainly be a rarity to locate a flat head. Some buyers are willing to pay $500 for MS-63's even if they don't have full heads. In order to rectify this situation, we have aligned the MS-63 column in the Monthly Summary to correspond with the MS-63 Full Head column in the weekly CDN.

GOLD: The only weakness seen for U.S. gold is in VF thru AU $20 gold pieces. Otherwise, it's business as usual. There are several advances in the MS-60 and 63 columns.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $317.00 per ounce.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (UNCIRCULATED) Strictly a grade for coins showing considerable signs of rub or wear on the high points of the design. Many bag marks and/or scratches may be present and the coin may have few or no eyeappeal.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. Should have full lustre. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65—but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck—and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63—but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

COMMONS & GOLD FINISH YEAR STRONG

This is The Final Issue for 1985——Happy Holidays!

The Market in Depth

Quite recently, we enjoyed an opportunity to view the ex-Wayne Miller Silver Dollar Collection. It will be sold at public auction January 27, 1986, by Superior Galleries. It will be part of a 3600+ lot sale. The sale consists of early U.S. gold, 3 Carson City dollar sets in BU, proof gold, U.S. commemoratives (gold & silver), 9 $20 gold 1907 high reliefs, 1794 dollar in at least MS-63, and a 1795 $5 gold piece in MS-63. The silver dollars will be sold as individual lots, so it will give collectors an excellent opportunity to bid on some of the finest silver dollars in existence. With so many numismatists engrossed with quality today, we thought it would be interesting to compare the grading of as many of the silver dollars as space will allow. We will compare the grading descriptions as found in the Superior Galleries' catalogue, along with the grades of the CDN. Also, we contacted two of the country's leading numismatic grading authorities to help in this task. Bruce Amspacher of Shawnee Mission, Kansas and Nick Buzolich of Tarzana, California, were selected for their critical eyes. Mr. Amspacher viewed and graded the set in mid-1983. He expressed the opinion that most, if not all of his grades would hold up in today's market. Mr. Buzolich graded the silver dollars in mid December, 1985. The CDN graded the coins just recently.

Due to the overall eye appeal of the silver dollars in this set, it is the consensus of opinion by the graders that prices realized may well exceed bid levels. Since many of the coins grade better than MS-65, this goes without saying. Although it is difficult enough to price MS-65 silver dollars sight unseen, some dealers opt to offer buy prices for MS-67 to MS-69 dollars, common dates (uncommon quality). In the past year alone, several common date silver dollars grading MS-68 and 69 have brought in excess of $5000. With the anticipated strong collector interest, this sale could produce many price records.

The following silver dollars are listed with the corresponding numerical grade of each grader. Where necessary, split grades were used. All of the dollars are mint state, some being P/L or Cameo P/L.

The 1878-S Cameo P/L is considered by some to be the finest known prooflike silver dollar. At one time Mr. Miller was said to have turned down a $10,000 offer. It is estimated that it may now bring as much as double the previous offer. Despite the variance in grade from MS-66 to 69, the 1886-O (Cameo P/L) is by far the finest known and probably cannot be duplicated at any price. Throw out the estimates, this could be the most actively sought coin in the set. The 1880 Cameo Proof Morgan is a wonderful piece. It has original toning around the periphery of the coin and there are no distractions. As one can see from the high grades, everyone was in relative agreement.

There are many more gem dollars in this set; along with the Hoagy Carmichael Collection this promises to be a very active sale with highly competitive bidding. For further information and/or obtaining a catalogue, please contact Superior Galleries in Beverly Hills.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (UNCIRCULATED) Strictly uncirculated coin showing no evidence of rub or wear, however no further specifications are necessary. Coin may be bag marked and/or unevenly struck and may have full lustre.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. Should have full lustre. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

Many grading opinions seem to some from a world that is not our own. But there's one third-party opinion that has its feet planted firmly on good old planet earth: the Numismatic Certification Institute, NCI.

NCI knows that coins are bought and sold in the real world. They bring together important factors like bagmarks, wear, toning, and luster together – and give a balanced opinion of your coin's grade

There's other advantages to NCI . . . like being able to request a grade to be certified. And NCI authenticity opinions are insured for up to one million dollars.

Get certification from the real world – instead of from an alien one. NCI. The number one certification service. Call 800-527-9250, or fill out the attached request form and send it, TODAY.

Provided that the Numismatic Certification Institute (The Institute) agrees with your grading of the submitted coin (if requested) and determines that the coin submitted is genuine, you will be issued a photographic certificate which shows a color photograph of the coin, its certified grade, and the value of the coin you have stated on the reverse side of this form. The Institute will guarantee that the certified coin is authentic, and will insure the authenticity of the coin up to the value you stated on the reverse side of this form, plus an amount equal to 15% of such stated value per year for each year the certificate has been outstanding before the coin is proven counterfeit. The value you stated will also represent the amount of insurance coverage against theft or other loss of your coin while in the possession of the Institute. If your coin is lost or stolen while in the possession of the Institute, such stated value shall be paid to you in full satisfaction of the obligations of the Institute. The Institute does not guarantee or warrant that the coin certified has or ever will have a market value in the amount you have stated as its value. The Institute only uses your stated value to determine the amount of insurance coverage and the fee to be charged.

The Institute will arrange for the certified coin to be offered for sale at public auction, at your option, through The Institute's affiliate, Heritage Numismatic Auctions, Inc., at the same grade as certified at a discount of 20% off of the seller's commission. For your option to be exercisable, however, the coin must be maintained in the same condition as it was as of the date of certification. Your certificate, along with the option to sell at public auction, is fully transferable.

If The Institute cannot agree with your requested minimum grade, then you will be charged a $5 fee, $2.50 for postage and handling, and the registered mail fee. If The Institute cannot certify your coins as genuine, and provides you an opinion that the coin is not genuine, then you will be charged the full fee of 2% of Owners Stated Value Plus $10 per Coin, $2.50 for postage and handling, and the registered mail fee. In order to transfer a certificate to another owner, please return the original certificate along with the $10 transfer fee.

Grading is an art, not a science, and therefore the opinion rendered by this certificate may not agree with the opinion of others (including trained experts), and the same expert may not grade the same coin with the same grade at two different times. For a permanent record, the grade assigned on this certificate on this date represents our opinion which is based on our experience and prevailing market standards. Grading standards have changed in the past, and as time passes and market conditions change over the years, they may do so again in the future.

The Institute guarantees that within 10 business days of receipt of your coins and your completed Request for Certificate, your coins and your certificate (or a disclaimer of opinion or an opinion that the coin is not genuine) will be sent by Registered mail to you. If the Institute fails to meet this deadline, your certification fees will be refunded when your coins are returned.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63 --but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.
